

Washing instructions

Scroll for the pile you are holding.
Generic front loader, 1–8 kg · Generic steam iron

LOADS — ONE LINE, ONE WASH
Bold pile names share one wash.

Cottons 60°	White + White Socks	~2:30
Cottons 60°	White Towels (on its own)	~2:30
Cottons 40°	Coloured + Coloured Socks	~2:15
Cottons 40°	Coloured Towels (on its own)	~2:15
Easy Care 40°	Microfibre Towels (on its own)	~1:30
Cottons 30°	Dark + Black Socks +-	~2:00
Delicates / Silk cold	Raw Denim (on its own)	~0:45
Wool 30°	MerinoWool + Cashmere Blend	~0:40
Sportswear 30°	Synthetic Activewear (on its own)	~1:10
Sportswear 40°	Gym Socks (on its own)	~1:20
Wool cold	Wool Trainers (on its own)	~0:40
Easy Care 40°	Linen (on its own)	~1:30

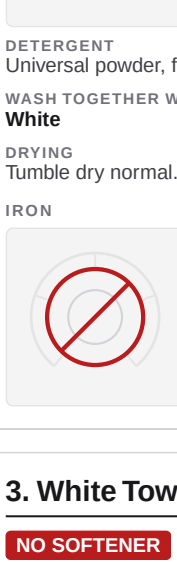

programme

The dials are drawn as they sit on the machine: twelve o'clock is Off, and the red pointer is where to turn it. Chips show every value the display steps through, filled in on the one you want. On the iron, the blue band is the zone where it makes steam.

1. White

NO SOFTENER Cottons 60 °C · 1200 rpm

WASH

Temp cold 20 30 40 60 90

Spin rpm 0 400 600 800 1200 1400

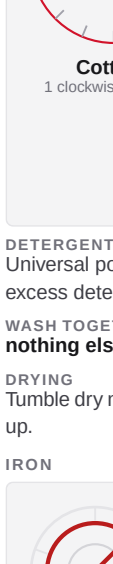

Buttons Speed Eco Easy Iron Extra Rinse

DETERGENT Universal powder, full dose — the bleach in powder is what keeps whites from going grey

WASH TOGETHER WITH **White Socks**

DRYING Tumble dry normal, or line dry in the sun — sunlight bleaches whites for free.

IRON

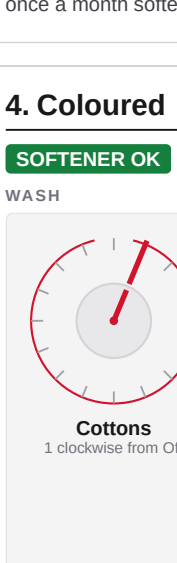

--- — cotton, linen · 200 °C
inside the steam zone
Iron while slightly damp, steam on. Cotton takes all the heat the iron has.

NOTES Wash whites on their own. One stray coloured sock is all it takes.

2. White Socks

NO SOFTENER Cottons 60 °C · 1200 rpm

WASH

Temp cold 20 30 40 60 90

Spin rpm 0 400 600 800 1200 1400

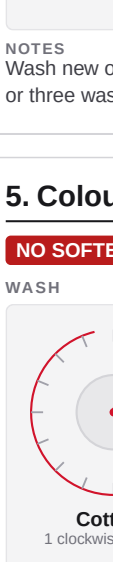

Buttons Speed Eco Easy Iron Extra Rinse

DETERGENT Universal powder, full dose

WASH TOGETHER WITH **White**

DRYING Tumble dry normal.

IRON

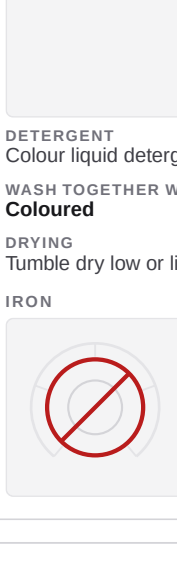

Do not iron

3. White Towels

NO SOFTENER Cottons 60 °C · 1400 rpm

WASH

Temp cold 20 30 40 60 90

Spin rpm 0 400 600 800 1200 1400

Buttons Speed Eco Easy Iron Extra Rinse

DETERGENT Universal powder, full dose. Go lighter rather than heavier: excess detergent stiffens terry.

WASH TOGETHER WITH **nothing else — wash alone**

DRYING Tumble dry medium — the tumbling is what fluffs the pile back up.

IRON

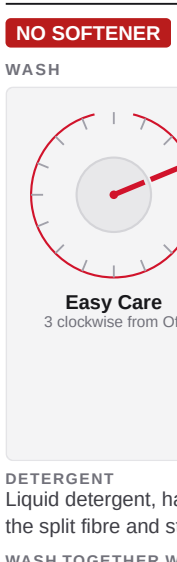

Do not iron
Ironing crushes the pile flat and the towel stops drying you.

NOTES Never fabric softener: it coats the loops in silicone and the towel stops absorbing. White vinegar in the softener drawer once a month softens instead.

4. Coloured

SOFTENER OK Cottons 40 °C · 1200 rpm

WASH

Temp cold 20 30 40 60 90

Spin rpm 0 400 600 800 1200 1400

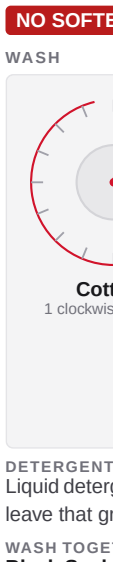

Buttons Speed Eco Easy Iron Extra Rinse

DETERGENT Colour liquid detergent — no bleach, no optical brighteners

WASH TOGETHER WITH **Coloured Socks**

DRYING Line dry inside out, or tumble on low.

IRON

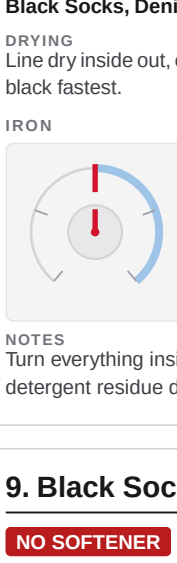

--- — cotton, linen · 200 °C
inside the steam zone
Steam, but turn prints and dark panels inside out first.

NOTES Wash new or strongly dyed items separately for the first two or three washes.

5. Coloured Socks

NO SOFTENER Cottons 40 °C · 1200 rpm

WASH

Temp cold 20 30 40 60 90

Spin rpm 0 400 600 800 1200 1400

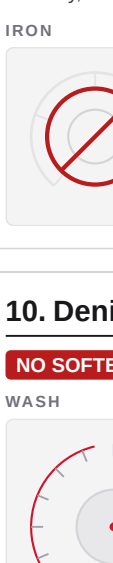

Buttons Speed Eco Easy Iron Extra Rinse

DETERGENT Colour liquid detergent

WASH TOGETHER WITH **Coloured**

DRYING Tumble dry low or line dry.

IRON

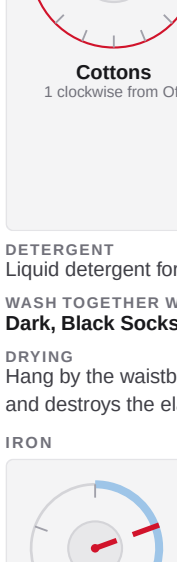

Do not iron

6. Coloured Towels

NO SOFTENER Cottons 40 °C · 1400 rpm

WASH

Temp cold 20 30 40 60 90

Spin rpm 0 400 600 800 1200 1400

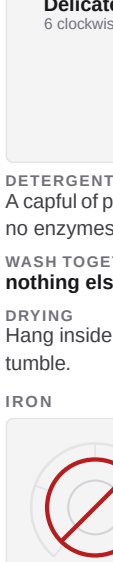

Buttons Speed Eco Easy Iron Extra Rinse

DETERGENT Colour liquid detergent. Go lighter rather than heavier: excess detergent stiffens terry.

WASH TOGETHER WITH **nothing else — wash alone**

DRYING Tumble dry medium — the tumbling is what fluffs the pile back up.

IRON

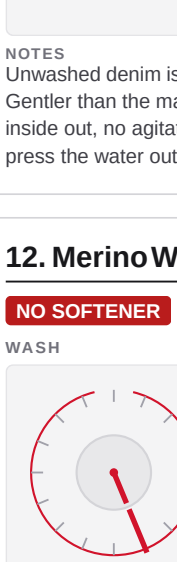

Do not iron
Ironing crushes the pile flat and the towel stops drying you.

NOTES Never fabric softener — it kills absorbency. Run them at 60 °C every month or so if they start to smell.

7. Microfibre Towels

NO SOFTENER Easy Care 40 °C · 1200 rpm

WASH

Temp cold 20 30 40 60 90

Spin rpm 0 400 600 800 1200 1400

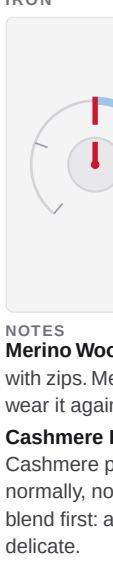

Buttons Speed Eco Easy Iron Extra Rinse

DETERGENT Colour liquid detergent, half dose. What doesn't rinse away stays in the split fibre and stops it picking anything up.

WASH TOGETHER WITH **nothing else — wash alone**

DRYING Air dry, or tumble on low. High heat fuses the split ends shut and the towel never absorbs again.

IRON

Do not iron
Polyester and polyamide start melting around 110 °C, well before the iron does anything useful.

NOTES Never fabric softener — it fills the split fibres with silicone and the towel is finished. Wash with microfibre only: the same split ends that make it absorbent grab cotton lint and never let go.

8. Dark

NO SOFTENER Cottons 30 °C · 800 rpm

WASH

Temp cold 20 30 40 60 90

Spin rpm 0 400 600 800 1200 1400

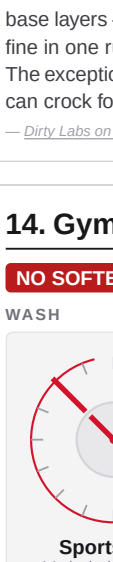

Buttons Speed Eco Easy Iron Extra Rinse

DETERGENT Liquid detergent for dark/black — optical brighteners are what leave that grey haze

WASH TOGETHER WITH **Black Socks, Denim**

DRYING Line dry inside out, out of direct sun. Skip the dryer: heat fades black fastest.

IRON

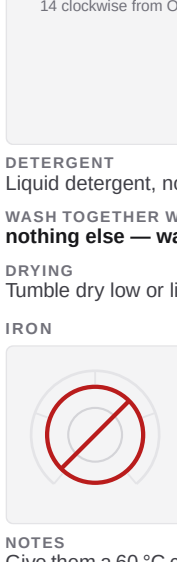

-- — wool, silk · 150 °C
inside the steam zone
Inside out, medium heat. Steam, don't press hard — shine on dark cotton doesn't come out.

NOTES Turn everything inside out. The extra rinse matters here — detergent residue dries as grey streaks on black.

9. Black Socks

NO SOFTENER Cottons 30 °C · 800 rpm

WASH

Temp cold 20 30 40 60 90

Spin rpm 0 400 600 800 1200 1400

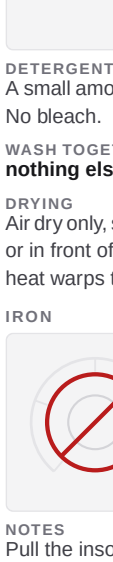

Buttons Speed Eco Easy Iron Extra Rinse

DETERGENT Liquid detergent for dark/black

WASH TOGETHER WITH **Dark, Denim**

DRYING Line dry, or tumble on low.

IRON

Do not iron

10. Denim

NO SOFTENER Cottons 30 °C · 800 rpm

WASH

Temp cold 20 30 40 60 90

Spin rpm 0 400 600 800 1200 1400

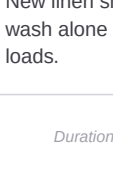

Buttons Speed Eco Easy Iron Extra Rinse

DETERGENT Liquid detergent for dark/black

WASH TOGETHER WITH **Dark, Black Socks**

DRYING Hang by the waistband and air dry. A hot dryer shrinks them and destroys the elastane in stretch denim.

IRON

--- — cotton, linen · 200 °C
inside the steam zone
Inside out on cotton heat if you want them crisp. Steam.

NOTES Inside out, zips and buttons closed. Wash them far less often than you think.

11. Raw Denim

NO SOFTENER Delicates / Silk cold · 400 rpm

WASH

Temp cold 20 30 40 60 90

Spin rpm 0 400 600 800 1200 1400

Buttons Speed Eco Easy Iron Extra Rinse

DETERGENT A capful of pH-neutral or denim-specific detergent. No bleach, no enzymes.

WASH TOGETHER WITH **nothing else — wash alone**

DRYING Hang inside out indoors, away from sun and radiators. Never tumble.

IRON

Do not iron
Pressing sets creases in the wrong places and flattens the fades that took months to earn.

NOTES Unwashed denim is meant to go months before its first wash. Gentler than the machine: a 45-minute cold soak in the bath, inside out, no agitation, no wringing — then roll in a towel to press the water out.

12. Merino Wool + Cashmere Blend

NO SOFTENER Wool 30 °C · 400 rpm

WASH

Temp cold 20 30 40 60 90

Spin rpm 0 400 600 800 1200 1400

Buttons Speed Eco Easy Iron Extra Rinse

DETERGENT **Merino Wool:** Wool detergent, half dose. No enzymes, no proteases, no bleach — they eat the fibre.
Cashmere Blend: Wool or cashmere detergent, half dose. No enzymes, no proteases, no bleach.

WASH TOGETHER WITH **each other**

DRYING **Merino Wool:** Never tumble dry. Dry flat on a towel, away from radiators and sun — hung up it stretches and never comes back.
Cashmere Blend: Never tumble dry. Squeeze the water out, never wring, then dry flat on a towel away from any heat.

IRON

-- — wool, silk · 150 °C
inside the steam zone
Merino Wool: Only if you must: pressing cloth, no weight. Hanging it in a steamy bathroom drops the creases without touching it.
Cashmere Blend: Low heat through a pressing cloth. Better still, steam it on a hanger and let the creases drop out on their own.

NOTES **Merino Wool:** Turn inside out, wash with wool only, nothing with zips. Merino barely needs washing — air it overnight and wear it again.
Cashmere Blend: Inside out, and only ever with other wool. Cashmere pills where it rubs — that is the fibre behaving normally, not a fault; a cashmere comb takes it off. Check the blend first: a little nylon makes it tougher, silk makes it more delicate.
— Icebreaker on merino

13. Synthetic Activewear

NO SOFTENER Sportswear 30 °C · 800 rpm

WASH

Temp cold 20 30 40 60 90

Spin rpm 0 400 600 800 1200 1400

Buttons Speed Eco Easy Iron Extra Rinse

DETERGENT A small dose of mild pH-neutral liquid detergent. Too much is what makes them smell.

WASH TOGETHER WITH **nothing else — wash alone**

DRYING Air dry on a hanger — dry within the hour. Tumble heat kills the stretch.

IRON

Do not iron
Elastane starts degrading around 110 °C, and the technical finish goes with it.

NOTES Inside out. Never softener: it films over the fibres these rely on for wicking and stretch. A cup of white vinegar in the rinse resets a load that already smells. Covers tops, shorts and base layers — one fabric family, one wash. Mixed colours are fine in one run: at 30 °C the dyes on polyester barely move. The exception is a brand-new black or strong red piece, which can crock for a wash or two — give that its own run first.
— Dirty Labs on synthetic activewear

14. Gym Socks

NO SOFTENER Sportswear 40 °C · 1200 rpm

WASH

Temp cold 20 30 40 60 90

Spin rpm 0 400 600 800 1200 1400

Buttons Speed Eco Easy Iron Extra Rinse

DETERGENT Liquid detergent, normal dose

WASH TOGETHER WITH **nothing else — wash alone**

DRYING Tumble dry low or line dry.

IRON

Do not iron

NOTES Give them a 60 °C cotton run every few weeks — 40 °C keeps them clean but doesn't reset the smell.

15. Wool Trainers

NO SOFTENER Wool cold · 400 rpm

WASH

Temp cold 20 30 40 60 90

Spin rpm 0 400 600 800 1200 1400

Buttons Speed Eco Easy Iron Extra Rinse

DETERGENT A small amount of mild detergent — a wool detergent is ideal. No bleach.

WASH TOGETHER WITH **nothing else — wash alone**

DRYING Air dry only, somewhere with moving air: outside, by a window, or in front of a fan. Never the dryer and never a radiator — heat warps the sole and shrinks the wool upper.

IRON

Do not iron

NOTES Pull the insoles and laces out first and wash those by hand. The shoes go in a mesh delicates bag or a pillowcase, on their own — a loose trainer batters the drum and everything in it.

16. Linen

NO SOFTENER Easy Care 40 °C · 800 rpm

WASH

Temp cold 20 30 40 60 90

Spin rpm 0 400 600 800 1200 1400

Buttons Speed Eco Easy Iron Extra Rinse

DETERGENT Mild liquid detergent, no bleach — bleach yellows linen and breaks the fibre down over time

WASH TOGETHER WITH **nothing else — wash alone**

DRYING Line dry, or tumble low and pull out a little damp — bone dry cracks creases in.

IRON

MAX — linen · 230 °C
While still damp, hottest setting, steam first.

NOTES New linen sheds a little dye/lint for the first few washes — wash alone until it rinses clear, then fine with other 40 °C loads.
